DETAILED ACTION

Allowable Subject Matter

Claims 1-11, 13-34 and 36 are allowed.

The following is an examiner's statement of reasons for allowance:

The applicant's amendment filed on September 10, 2007 has obviated the prior art recited in the Office action dated June 7, 2007. Cho (US 4,534,934) does not teach removing a majority of the peripheral portion as claimed in the instant claims 1 and 34. Furthermore it would be impossible for Cho ('934) to remove a majority of the peripheral portion (i.e. the infiltrated peripheral portion) of the diamond wire die compact of Cho ('934), because the entire body of the diamond wire die compact of Cho ('934) would be infiltrated by cobalt with the axial sweep-through infiltration of Cho ('934). In contrast, the infiltrated portion of the instant invention caused by a radial infiltration extends not further than 500 microns inward from the peripheral edge as claimed. Therefore, it would not have been obvious to one of ordinary skill in the art at the time the invention was made that the limitation of the eutectics as claimed in the instant claim 21 and the limitation of the plastically deformable region as claimed in the instant claim 23 would be met by the teachings of Cho ('934) due to the differences in the processes (axial infiltration of Cho ('934) versus the radial infiltration of the instant invention). A further search for the references on record did not find any prior art which anticipates or renders obvious the claimed subject matter of the instant application alone or in combination.
